I think I've found a few more tunes I like in this one over the first, but that's going to be a matter of personal taste. If you have never used a "Real" book - it's the 'head' (melody) with a basic chord structure over the top. They label "verse" and "bridge" rather than the traditional "A", "B", "C" sections. I'd ding it it half a star for that, but that's from me coming from Jazz Forms. All the songs are good, the chords are reasonably accurate (there may be one or two off here and there, but nothing I'm going to get worked up over - you're never going to get exact when you're trying to

condense multiple instruments into one line). If you're trying to work out a solo guitar arrangement for these songs (ie: you want to play the song for your buds at a tailgate or party or whatever) then this is going to be perfect for you. If you want the exact notes played by the artists on the specific take they used on the specific day they recorded to make the specific studio version that got the radio airplay, you're going to have to look elsewhere. Myself, I love chord books. Chords give me freedom: I can play what's written, make "family" substitutions (G9 for G7, Gmaj7 for G, etc...), tritone substitutions, altered chords, play it straight, jazz it up, ... in short - I can make it my own. That's what Real Books (and Fake Books) let you do. Quality of the book itself: I'm not a huge fan of the plastic comb bindings. When I buy a music book (or any book for that matter) that has a normal binding I want to lay flat, I take it to Office Max, pay them \$5 or so, and they put a heavy duty spiral binding on.
