Yes, I know, there is a movie called "The Sum of All Fears," but whatever it was based on, it wasn't this book. Now they even have two characters from the movie on the cover of the book, but that's misleading, because those characters don't exist in the book. One is a young rookie CIA operative named Jack Ryan; the other is his mentor, Morgan Freeman - well, he has another name in the movie, but it's the same character Freeman always plays, the all-wise, all-knowing elder statesman with no character flaws and never a lapse in judgment. The book's main character is also named Jack Ryan, but he is a veteran analyst who has worked his way up to number two in the CIA. The top guy, who happens to have the same name as the Morgan Freeman character in the movie, is a stuffed shirt who is content to bask in the perks of his position and let Ryan run the agency, and is little more than a bit player in the book. The centerpiece of both book and movie is the bad guys setting off a nuke at the Super Bowl. But the events leading up to and following the nuclear detonation are what make the book the riveting thriller that it is, and none of that found its way into

the movie. In the book, Ryan has managed to get on the bad side of the president's girlfriend/National Security Advisor. That doesn't really figure significantly in the action until after the bomb, but along the way, in a comic-relief scene I find myself pulling the book off the shelf and rereading repeatedly over the years, we get to see the mysterious and sinister Mr. Clark morph into a marriage counselor and save the Ryans' marriage. I'd love to see a movie depiction of Clark and Chavez escorting Cathy Ryan through a bad neighborhood to a restaurant ("We can't go out, the neighborhood isn't..." "Um, safe, ma'am?
