Customer Reviews

A companion book to the Hal Leonard Bass Method (Book 2.) As such, there is no theory and the book can be used on it's own. I wish that the writers of this series and the "Easy Pop Melodies" series had worked together so that our kids could play together.

This book is just like the first book in the series, lot of fun tunes to play along with. Even though I only play (like) about half the tunes, I gave a good rating because these CDs really make practicing fun. What more can I say?

i was happy that this book came with the cd and in perfect condition. however, i was unaware that there were no tab lines. while i was a little disappointed by this, i guess i'll just have to work on reading music!
