# Looking Down The Corridors: Allied Aerial Espionage Over East Germany And Berlin, 1945-1990

## Synopsis

The only book to examine Berlin operations in detail, written by experts with extensive first-hand knowledge. Between 1945 and 1990 the British Government mounted some of the most successful intelligence operations of the Cold War. Conducted in great secrecy, aircrews flew specially modified light transport and training aircraft to gather intelligence on the Soviet and East German military targets that surrounded Berlin. The air corridors comprised three regulated airways for civil and military air traffic of the Western Allies between West Berlin and West Germany passing over East Germany's territory. Operating under the guise of transportation and training flights, they exercised their right of access to Berlin along the corridors and over the city to gather huge amounts of imagery for nearly 50 years. Together with their French and U.S. counterparts, these flights provided the western intelligence community with unique knowledge of the organization and equipment used by Warsaw Pact forces. For the first time, using recently declassified materials and extensive interviews with those involved, this book provides a detailed account and analysis of these operations and their unique contribution to the Cold War intelligence picture.

## Book Information

File Size: 3090 KB

Print Length: 224 pages

Publisher: Spellmount; 1 edition (August 1, 2015)

Publication Date: August 1, 2015

## Customer Reviews

I enjoyed reading about the history of surveillance in the Berlin corridors. I was there as part of the maintenance team and found the story accurate and engaging.
